

## Seattle-Sweden Type 1 Diabetes Symposium May 4, 2010

As part of Seattle-Sweden week, as Seattle goes Swedish, we organize a scientific symposium focusing on T1D research and the major collaborations that we enjoy between Seattle and Sweden in T1D research. In addition to presenting new data each presenter will discuss problems in their area of research. Each talk will be followed by ample time for questions and discussion. The symposium is open to everyone in the greater Seattle scientific community.

- 8:15-8:40 Coffee/Tea
- 8:40-8:45 Welcome  
Jerry Palmer, MD, Professor of Medicine  
Director, Diabetes Endocrinology Research Center,  
University of Washington
- 8:45-9:15 Can We Rely on Results of Clinical Trials?  
Johnny Ludvigsson, MD, PhD  
Professor of Pediatrics  
Linköping University
- 9:15-9:45 Practical Prediction of Type 1 Diabetes in the General Population  
William Hagopian, MD  
Scientific Director  
Pacific Northwest Diabetes Research Institute
- 9:45-10:15 Pitfalls in Measuring the Beta Cell in Clinical Trials  
Carla Greenbaum, MD  
Director, Diabetes Research Programs, Benaroya Research Institute
- 10:15-10:45 GAD65Ab-Specific Anti-idiotypic Antibodies:  
Potential Markers for C-peptide Levels?  
Chris Hampe, PhD  
Research Associate Professor, Medicine, University of Washington
- 10:45-11:00 Coffee
- 11:00-11:30 Next-Generation Strategies

for Profiling Autoreactive T-cells in Type 1 Diabetes  
Gerald T. Nepom, MD, PhD  
Director, Benaroya Research Institute at Virginia Mason

11:30-12:00 T-cells from Diabetes Patients Respond to Islet Proteins:  
What Does it Mean?  
Barbara Brooks-Worrell, PhD  
Research Scientist, University of Washington

12:00-12:30 Problems with Interpretation of T-cell Studies in Type 1 Diabetes  
Rosaura Casas, PhD  
Associate Professor of Pediatric Immunology, Linköping University

**Welcome!**
